Dell latitude restore to factory settings windows 10

If you're having problems with your Dell laptop/desktop computer, such as a pc that crashes and can't log on normally, you might need to reset your Dell PC to factory settings to fix the problems. How do I reset my Dell laptop/desktop pc to factory settings without signing in? Follow this article to choose the appropriate method that depends on what system on your Dell Inspiron, XPS, Latitude, Vostro, Alienware, Studio, Venue, Precision, and OptiPlex computer, such as Windows 10/8.1/8/7/Vista/XP. Tips: When you reset your PC to factory settings, the PC settings, the apps you install, or your personal files are erased. Therefore, it might be a good idea to back up your data and keep it in a safe place, such as an external CD, USB flash drive, or cloud storage service. Reset your Dell PC to a different Windows: Windows 10/8.1 Windows 7/Vista Windows XP Windows 10/8.1.1. Start your computer in the Windows Repair Environment (WinRE) If your computer crashes and cannot start on the logon screen, start your computer several times. On a windows 10/8.1/8 laptop,the system cannot start normally, it automatically starts in WinRE mode. If you can still start on the Windows sign-in screen, press and hold shift, click the power button, and then select Restart. (Hold down the Shift button until the Select Option window appears.) 2. When booting into WinRE mode, click Troubleshooting. 3. Click Reset this computer. 4. And then you'll see two options you can choose: Keep my files or Delete All. Keep my files: This option removes apps and settings, but keeps your personal files. Delete Everything: This option deletes all your personal files, apps, and settings. 5. Select an account that logs on to your computer frequently. 6. Enter the password for the user account and click Continue. If there is no password for this account, leave the text box blank, and then click Continue. So if you set a password for your administrator account and forgot your Dell computer password, you won't be able to reset your PC to factory settings. 7. When all things are ready for the trip, click Reset, the reset process will begin. Tips: Make sure your computer is plugged into a power source to prevent your computer's battery from draining during recovery. 8. Wait for the reset process to complete and set up your computer. Windows 7/Vista 1. Restart your Dell computer and press F8 repeatedly until the Advanced Startup Options menu appears on the screen. 2. Use the arrow key (↔) to select Repair Computer, and then press Enter. 3. On the System Recovery Options menu, select the keyboard layout, and then click Next. 4. Select your account, enter your password, and then click OK to continue. If you forgot your administrator account password, be able to reset your Dell laptop to factory settings. 5. The choice of Dell Factory Tools or Dell Factory Image Restore depends on your Dell computer's configuration. 6. Click Next to continue. 7. Check the next to Yes, reformat your hard disk and restore your system software to factory state, and then click Next to start the reset process. 8. Wait for the process to resume when it is complete, click Finish to restart the computer. Windows XP 1. Restart your Dell computer, press and hold Ctrl+F11 until you see dell sign-in, and then disappear. 2. Click Refresh. 3. And then click Confirm, it will start the reset process. 4. Wait a while for the message to appear saying System Restore was successful, click Finish to restart your Dell computer. Related article Running Dell Inspiron factory reset _i_s relatively easy. Resetting factory settings on Dell laptop models is fairly consistent, and this process will work on more than just an Inspiron laptop. Factory reset erases everything and basically erases everything that was done after you purchased your PC. Returns to the original settings with the same pictures and all. Before you erase your computer, back up your Dell files to make sure that nothing is lost. When the restore starts, all information stored on your computer is permanently deleted. You can use backups using several different systems. Consider setting up a cloud storage system that stores all your valuable information. Google Drive and Dropbox are two popular programs that offer cloud solutions with free account options. However, when you reach a certain storage limit, additional storage will require a fee. You can also save files to a USB flash drive or to a larger physical backup drive. To back up your files, open Control Panel and access the folders you want to save. Simply copy the folders and paste them into the storage folder. Physical storage appears in Control Panel next to other folders for easy copy and paste. A cloud-based drive may require folders to be downloaded through their system. After you run the backup, check each file to make sure it's saved correctly. You won't have another chance to save files, so make sure it was done correctly and everything is present. First, remove everything that's connected to your computer except the power cord. Inspiron is a laptop, so there's no mouse, keyboard, or monitor. If you have something like an external drive, printer, or other external device, remove the connection. Open computer search and type Refresh to retrieve the list of options. Alternatively, you can access system settings from Control Panel. To start the reset, select Reset this computer. Click Restart Now under Advanced Startup. A window with several options starts. Click troubleshooting then Factory Image Restore. starts with a series of steps to receive. Run each prompt until the computer restarts. It takes some time to perform because everything is erased and reformatted to its original settings. After restarting, the computer resets to factory settings and is the same as when was brand new. There is one alternative path to clean up your computer. Access the same Reset my computer in system settings and select Get Started. To erase your computer, select Remove All. You'll only be able to delete files or delete everything and clean up the entire drive. When the process is complete, your computer restarts with a new disk. This is the fastest way to wipe your hard drive on your Dell Inspiron. These instructions are specific to Windows 10. Each operating system has a slightly different process for resetting. This process may vary even if your Dell Inspiron device is having trouble loading the operating system. In many cases, factory reset is performed when the current system is broken. Dell provides step-by-step instructions on how to restore a device that is not loading correctly. Last Updated Feb 6, 2020 at 07:33 AM by David Webb . If your Dell laptop starts crashing, one of the options you need to fix is to reset it to factory settings. Depending on the model you own, the procedure may vary slightly. N.B.Before starting, please note that restoring your computer to the default factory configuration will delete all data on drive C. We strongly recommend that you back up all personal files before moving forward with the restore. Restart your computer by clicking the arrow & run next to lock and & restart. After you restart your computer, press F8 until the Advanced Startup Options menu appears on the screen. Note You must press F8 before the Windows logo appears on the screen. If you press F8 when you press the Windows logo, the Advanced Startup Options menu won't appear on the screen. If you don't see the Advanced Startup Options menu, restart your computer and repeat this step until the menu appears on the screen. Press the down arrow to select Repair Computer on the Advanced Startup Options menu, and then press Enter. Select your language settings, and then click Next. Log on as an administrative user, and then click OK. Then click Dell Factory Image Restore. In the Dell Factory Image Restore window, click Next. Select the Yes check box, reformat your hard disk and restore your system software to factory conditions, followed by Next. Your computer will now be restored to factory defaults. When the restore operation is complete, click Finish to restart your computer.
